

Paranoia Blues

Everybody's out to get me
Everybody's on my case
I see vengefulness and malice
there in every strangers face
Oh paranoia blues got me scared as I can be
I'm waiting for the devil
To pull the rug from under me

I found another member
For the club of deadly sins
I'm a slave to indecision
And the misery it brings
Oh paranoia blues keep on playing with my head
Gotta keep my master happy
Gotta keep that monster fed

Trying to make a stand against
These bitter winds that blows
Trying to still that voice inside
That's eating at my soul

Last night I dreamt I woke up
and the whole house was on fire
I couldn't move a muscle
I just watched the flames grow higher
Oh paranoia blues got it's foot down on my neck
I'm swinging for the fences
Every time I hit the deck

Standing in the midnight forest
Looking for the moon
I thought I had the answer
But I reached for it too soon

Even when I'm happy I don't trust the way I feel
Cause every little piece of joy
my old friend's out to steal
Oh paranoia blues got a chain around my heart
It's hard to see a future
When you're living in the dark
